Single Tank Rack Conveyor Dishwasher

- Automatic conveyor, rack type, single tank dishwasher with recirculating wash and fresh water final rinse.
- 0.63 gallons per rack at 20 PSI
- Capacity is 233 (20" x 20") racks per hour or 5,825 dishes per hour
- Telescoping doors allow for efficient daily cleaning
- Dual IS Booster System built into the machine

CrossFire Wash System power sprays water horizontally, as well as, from above and below, cleaning and sanitizing the dirtiest of ware.

STANDARD FEATURES

- CrossFire Wash System
- Color-coded curtains
- Tank heat: integrated booster
- Heat and energy saving transfer system
- Manifold clean-out brush
- S/S 304 stainless steel construction.
- Automatic tank fill
- Low water protection
- Single point electrical connection: motor, controls and tank heat
- Detergent connection provision
- Elevated top mounted control panel
- Door safety switches
- Standard frame drip proof motors
- Override switch for de-liming
- SureFire Start-Up & Check-Out Service
- Ventilation fan connection provision
- End caps/pipe plugs secured to prevent loss
- VFD controlled continuous drive conveyor

OPTIONS

- VaporGuard System
- Tank heat:
- Electric
- Steam coil
- ☐ Pressure reduction valve and line strainer
- ☐ Vent cowl collar with adjustable damper controls
- Security package
- ☐ Rack limit switch
- ☐ Power Loader
- □ Power Unloader
- ☐ Plastic 20" x 20" racks (plate or silver)
- ☐ Two point connection

Additional Information

Capacity Per Hour	234 racks 5225 dishes 200-400 meals
Tank Capacity	19.9 gals. (pre-wash) 33.75 gals. (wash)
Motor Size	2 hp (wash) 1/15 hp (conveyor)
Electric Usage	18 kW built in booster 40° rise 29.4 kW built in booster 70° rise
Final Rinse Peak Flow at 20 psi min.	2.5 gallons/minute
Final Rinse Consumption at 20 psi min.	147 gallons/hour 0.63 gallons/rack
Peak Rate Drain Flow	9 gallons/minute
Installation distance from vertical combustible surface	2"
Shipping Weight	750 lbs.

SPECIFICATIONS

CONSTRUCTION- Hood and tank constructed of 16 gauge type 304 S/S. Hood unit of all welded seamless construction. S/S frame, legs and feet. All internal castings are non-corrosive lead free nickel alloy, bronze or S/S.

DOORS- Zero-Infringement Doors are extra large die formed, type 304 S/S, front inspection doors. The vertically opening doors glide in full length tracks on either side. Automatic safety catch at full open locations.

CONVEYORS- One S/S roller chain conveyor, with rack driving dogs every sixth link, running along the rear of the machine. Eight free spinning rollers placed along the front wall of the machine. Conveyor accommodates all standard 20" racks. Conveyor drive system includes direct drive gear motor powered by UFP to guarranty proper speed. Racks conveyed automatically through washing and rinsing systems, powered by an independent 1/15 hp drive motor.

PUMP- Centrifugal type "packless" self draining pump. Construction includes ceramic seal and a balanced cast stainless steel impeller on a precision ground stainless steel shaft, extension or sleeve. 2 hp motor, standard vertical C-face frame, drip proof, internally cooled with ball-bearing construction

CONTROLS- Top mounted control enclosure, housing motor overload protection, contactors, transformers and all other dishwasher controls. All controls safe low voltage 24 VAC.

ENERGY SAVER- Rack actuated lever automatically operates the final rinse solenoid only when a rack passes, saving water and energy. The lever also activates an adjustable timer control. If no ware passes during the set time, the machine shuts down.

SPRAY SYSTEM- Spray arms made of type 304 stainless steel pipe. Spray assemblies removable without the use of tools.

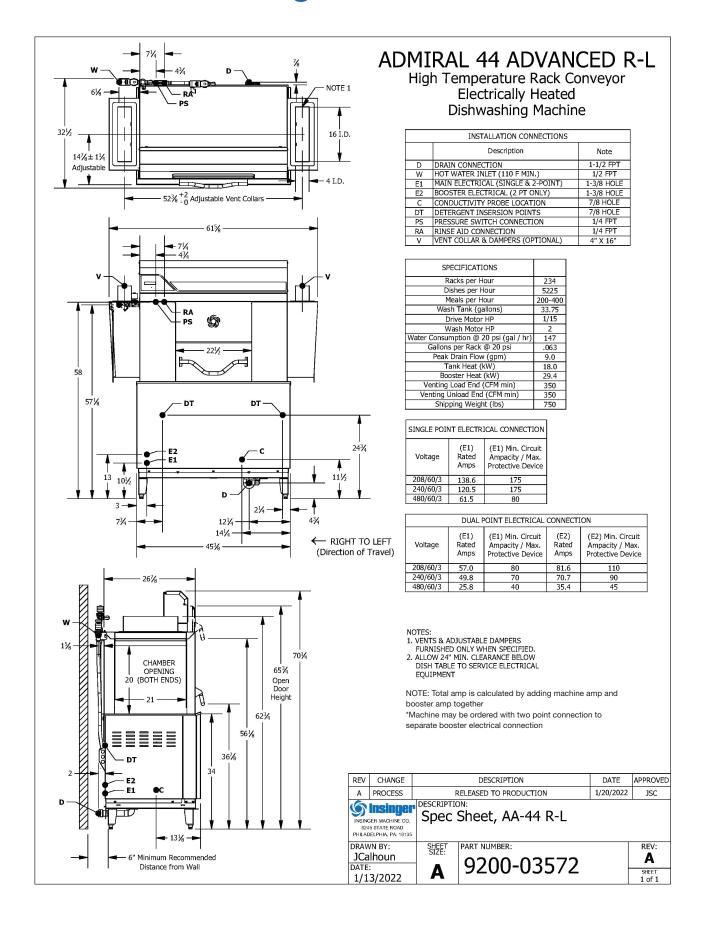

WASH- Upper and lower manifolds with the patented CrossFire® Wash System. One manifold above with 3 power wash arms, each with 5 high pressure cleaning slots and one manifold below with 4 power wash arms, each with 7 high pressure cleaning slots. The slots are precision milled for water control producing a fan spray. Wash arms are fillet welded to the S/S manifold. The CrossFire® Wash System provides 2 horizontally spraying high pressure nozzles.

FINAL RINSE- High efficency CNC machined nozzles located in an optimal configuration for rinsing and heat transfer. Nozzle assemblies produce a fan spray reducing water consumption while maximizing heat retention.

DRAIN- Foot-operated drain lever. Energy saving bottom skimming overflow system. Heater is protected by low water level control.

Note: Exhaust requirements are for pant leg connections only. For hood type, CFM requirements vary, consult hood manufacturer for specific sizing.
